Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The rejection of claims 12-24 under 35 U.S.C. 101 were discussed. In particular, the attorney proposed additional claim limitations to add a physical computer system with a display means. The examiner also suggested removing the word "method" from the claims to make it clearer that the claim falls under only one statutory class of invention. Further, the examiner suggested that "computer-readable signals" be removed from claim 25. The prior art rejections using Metke, Itkis, and Langan were also discussed. The attorney proposed adding the limitation of "wagering game" to independent claim 1 to overcome rejection under 35 U.S.C. 102 using Metke. The examiner indicated that the additional limitation would likely overcome the Metke reference under 102. The examiner also suggested that the "wagering" limitation be added to claim 1 as a positive method step. The attorney also presented an argument as to why the combination of Metke and Itkis under 35 U.S.C. 103 is improper. The attorney argues that the combination of Metke and Itkis is improper because Metke is directed towards an amusement game and Itkis is directed towards a free-play only game which is free-play in order to overcome gaming laws. The examiners indicated that further consideration of the applicant's arguments in specific view of the claims would be necessary.
